A fast and exciting game with non stop action. I especially enjoy the freedom of an enire arena in which you are free to fly around in all directions to locate and shoot your opponents. Game will not start, says incapitable program. Game is a lot of fun. Need to watch werewolves lobbies to find busiest times, but so much fun.. Screw this buggy crap, save you money.. VERY solid TD game.. I can't speak for games later in the series.

Galactic Civ as a series looked interesting enough for me to give it a try when it was on sale. I was expecting something more like a SRPG with a science-fiction setting... I didn't realize that the focus of the gameplay was closer to Civilization than a turn based "Homeworld" (focusing on spaceship combat). Besides a handful of scenario missions there doesn't seem to be much to play besides setting up stand alone games.

There's plenty of playable alien races and a couple different classes of ships, but I found the interface and gameplay to be hard to comprehend, and no real tutorial to teach you during play for people that don't want to read the manual.

Better than I thought it was going to be interesting, has its problems and I talk about them in Video. Take a trip through the Amazon while drinking beer and laying on the couch in a run-down trailer in the middle of butt \u2665

Obviously before being escorted off the campus and arrested for not being employed by any institution and in fact not being employed for the past 30 years.

## Video review:

https://youtu.be/xnMuN8oeXVE. Now I understand reviews like: PLEASE DON'T!!. This game is a steaming pile of crap. It is a complete rip off of Nuclear Throne. BUT if you are someone like me, you will find it enjoyable ONLY because of the bugs and you know how much of a ripoff it is. You have to have a VERY open mind and to be in a very messed up kind of humorous state of mind. -8/10 IGN.

Tried Multiplayer, so broken it is great.. This game just plain sucks. It's a board game style, frivilous tween expose, for girls interested in the intricacies of the 1920's social heirarchy. Of which I am not! You will find yourself playing the same cards very quickly and knowing all the responses. It's repetative, uniteresting, and all together a mess of a game. Although I am not the target audience. I'm not sure those who fit this game will even appreciate it.. tl:dr - A half decent game, I would give it a 50% overall on both of the aspects it is made up of (and no I don't mean the light and the dark of the narrative). It is neither a Rationalist, or Willfully Ignorant, but a Dualist.

Ok, enough of talking about the game in the game's terms. This Strange Realm of Mine essentially boils down to two parts: gameplay, and philosophy/psychology. It tried to be fun and interesting in terms of gameplay, and only barely got there. It tried to be an interesting exploration of philosophical/psychological thoughts and themes, but only barely got there. It does neither one quite right, and the whole game suffers for it. In the end it was a mashing of things that didn't really fit, at least from my perspective, and isn't that one of the things that this game is about? At least I think it is, it is legitimately hard to tell at times, as this game goes all over the place with it's philosophical musings, and yet stagnates under unchanging, unchallenging gameplay.

The graphics are meh. In a game that is more about fun gameplay (think games like Minecraft or Terraria) that sort of thing can be overlooked, but this did not really have fun gameplay, so it can't really be overlooked, because you constantly have to look at it. The character/enemy designs were interesting, the art nice and creepy, but that and the simple puzzles do not flesh things out enough, they don't make a game. Thankfully you can sprint in this so that things don't get too tedious, but then you are forced to direct a blimp through mountains for five minutes while nothing happens. This game reflects it's own themes of duality, but not in a good way. For everything good, there is something bad, and you don't want that in a game.

Ultimately it has an interesting premise, and could have been both a fun game and a fascinating exploration of philosophical and psychological elements, but it just doesn't quite reach what it is grasping for, or the level needed for me to give it a positive recommendation. If you are still on the fence and want to give it a try: Do NOT buy this for 15 dollars, it is not worth that high of a price tag. You will honestly only get around 2.5 hours of gameplay per runthrough.. I'll make this short. HL Before is a kick in the balls not only to every HL fan, but also for the whole HL universe and Valve.

Poor english ("Spacial Thanks"? Are you kidding?), unstable framerate, easy boss battle, badly looped music, very short and please buy a decent microphone to the voice actor.

This should be take as example of how NOT to do a videogame.

At least it's free, so if you want to waste half an hour of your life without spending a cent, go play this.

. Ok I enjoyed the game. The Audio was not bad, but its short. And no way to lose. I would love to see this style continued.. 5/10 Not the best by far, but not the worst solitaire game either. Wait for a sale, is my advise, and only get this if you've played just about all the other solitaire games out there.

I suspect this was made longer ago than other solitaire games. It feels more bare bones than others. And the number of cards you get on some levels is off. For instance, you need to uncover a hammer to turn over cards with stone on them but I kept clicking and clicking on the deck and not getting the card I needed. Now there are wild cards you can use. They are numbered and one time use. So you could use one of those if you have the one you need to continue. And in the store you can buy a random wild card. That was the first red flag that popped up in my head. Hmm....this might be one of those game that was phone/tablet game with in-app purchases and they want you to buy more wild cards. On Steam this cannot be done so we are stuck with the way it is. YOu'll have to do some grinding to build up your wild card deck and money to buy special help items. That's another

red flag, becauase I did not gain enough money to buy all the help items! That is the first time that's happened to me in a solitaire game. Usually by the last level one has already bought them all.

Graphics look older and are just ok. Nothing special.

Sound: I don't know because I turned it off to listen to my own music while playing.

Final thoughts: Since Steam only has a yes/no review system I'm giving it a tentative yes. I only give "NO"s to really, really bad games. This one is just for solitaire fanatics who have played everything else and need something new to play. Not the best by far. But not really the worst. I've seen one that is blatantly skewed to in-app purchases and they didn't change it for Steam. This one isn't as bad as that, just middle of the pack (heh, heh, nice pun, eh? pack?)
